

QUICK REFERENCE

WORKING WITH A LICENSE FOR REUSE

WHAT IS A LICENSE FOR REUSE?

Copyright law protects works (text, images, audio/visual works, etc.) against unlawful use. Works with a license for reuse can always be used. The most common licenses are the Creative Commons license. What is possible with the licensed work is dependent on the Creative Commons license used. See what each license means via <https://creativecommons.org/licenses/?lang=en>. Other, less frequently used license also exist that allow authors to flexibly set their works in the public domain. Carefully check under which restrictions the author has released their work before reusing.

CONDITIONS FOR USING SOURCES WITH A LICENSE FOR REUSE

An author can chose to release their work into the public domain under a license that allows and restricts certain uses of their work. A creative commons licenses is made up of four building blocks in various combinations. These building blocks are:

Attribution (CC BY): A license with BY requires that a reuser cite the original author of the work when sharing or using the work. With the exception of a CC0 license, which permits the free use and reuse of a work without restriction, CC BY is always part of a CC license.

NonCommercial (NC): A work with a NonCommercial restriction may not be used or reused for profit.

NoDerivs (ND): The NoDerivs restriction in a CC license means that the work can be used and reused for commercial and non-commercial use as long as the original work remains in whole and unchanged.

ShareAlike (SA): This component of a CC license means that the author of the original work gives you permission to do what you want with his work as long as you release your version into the public domain under the same copyright conditions they released theirs.

In addition to a license for reuse information can be released into the public domain using an Open Access-model. Open Access is a broad academic movement that attempts to make scientific information such as thesis, journal articles and books available and free online. These works are free or very inexpensive in price but not free from copyright law and restrictions for use. For more information on Open Access check out <http://www.openaccess.nl>

HOW DO YOU FIND SOURCES WITH A LICENSE FOR REUSE?

Use CC Search

Content for sharing, reusing and remixing can be found via <http://search.creativecommons.org>. The site offers access to diverse search engines for images, media, videos and music and insures you only search for works with a license for reuse. You can chose a search engine out of a list as well as indicate if you would like works that can be used for commercial use, changing and reuse.

Use Wikimedia Commons, Europeana or Wikiwijsleermiddelplein

- **Wikimedia commons** (images and audiovisual works): search from millions of photos, images, soundbites and video's with a license for reuse via <http://commons.wikimedia.org>.
- **Europeana** (Books, photos, and audio/visual works): via <http://www.europeana.eu> you can search for books, films and photos with a license for reuse including works usable without restrictions (a CC0 license). You can further restrict your search using type via the menu on the left hand side.
- **Wikiwijsleermiddelenplein** (educational resources): search for educational resources with a license for reuse can be found the Higher education page of the educational platform [wikiwijsleemiddelenplein](http://www.wikiwijs.nl/sector/ho/) via <http://www.wikiwijs.nl/sector/ho/> (only in Dutch).

Set your usual search engine to only search for sources with a license for reuse

- **Google** (text, video, audiovisual works, etc.): using the advanced search http://www.google.com/advanced_search usage rights setting you can restrict your google search to find images and videos that permit reuse under the conditions you have selected. You can find the advanced search option under the Settings icon. This also works with Google Images and Google Video.
- **Flickr** (images): Yu can indicate that you would like to find images with a creative commons license via the advanced search option on Flickr <http://www.flickr.com/advanced>. You can further specify for images usable for commercial use or reusable for changing and reuse in your own images.
- **YouTube** (audio/visual works): through the use of your own YouTube account you can search for videos with a creative commons license. Log in and go to Video Manager. Click on the CC-logo on the top left hand corner of the screen and search using your desired subject.

Use Stock sites

- Stock sites are sites that specifically offer photos, illustrations and audiovisual works for reuse. Because these sites are commercially driven you need to be keenly aware of the license terms of use for each site and a cost maybe required for use. Frequently you can indicate if you would like to search for something with a license for reuse via the advanced search option.
- **For photos and visual material:** <http://www.sxc.hu>, <http://www.freerangestock.com>, <http://www.rgbstock.com>, <http://www.unprofound.com>, <http://www.kozzi.com>.
- **For audio material:** <http://www.freestockmusic.com>, <http://www.audiomicro.com>, <http://www.audiojungle.net>.
